ABOUT THE COMPANY

AMAZING HI TECH SOLUTIONS Pvt. Ltd. (AHTS) company is managed by a group of Highly Qualified professionals who has over 3.5 decades of experience in Middle East to their credit in General Construction, Mechanical-Electrical-Plumbing Services (MEP), Sports Facility Construction, Landscaping, Offshore Works, Beautification Projects, Facility Management, Trading etc.

AHTS is committed to keep up the ethical values of business by maintaining the Principles of Honesty, Integrity and Respect.

AHTS is committed to promote renewable energy solutions (Solar/Wind/Biogas) for its clients (Industrial/Institutions/Corporates/Residential) and to become a leading contributor to the Green Energy Initiative in India.

AHTS is also focussing on providing other Hi Tech solutions for our clients such as Lifts, Generators, Inverters, Foot ball Turf, GRP Sectional Panel Tank work etc.

AHTS has a vast network of channel partners and tie ups with all major distributors of products, Both Indian and international brands.

- **TRANSUN ENERGY SYSTEMS**, Chennai who are pioneers in the field of Solar energy solutions is Our partner for the SOLAR ENERGY SYSTEMS. They are having experience of executing more than 3500 solar projects for over a decade in and out of India with a Cumulative of 150 MEGA WATTS Solar Projects so far.
- The Workforce Is lead By Qualified Managers, Engineers, Project Coordinators And Supervisors.
- The Company has a dedicated team of Technicians, skilled and unskilled Workers and utilizes the Latest methods and Machinery for the projects.
- We are always committed to our customers by delivering the quality of work accomplishment within scheduled time frame.

MESSAGE FROM THE MANAGEMENT

AMAZING HI TECH SOLUTIONS Pvt. Ltd. is always committed to its Customers by delivering exceptional quality of work which will be accomplished within scheduled time frame, which we believe is the Secret of Our Success till now in all the Projects undertaken by us. We take great care to maintain our reputation by ensuring customer friendly relationships with our clients, by being an Employer of choice and by being an active member of society willing to contribute to its welfare.

A.VIJAYABALAN

B.E, A.M. Aesl

FOUNDER & CEO of TRANSUN ENERGY SYSTEMS

Chennai

About Mr.A.Vijayabalan

An Aeronautical engineer Turned to be a entrepreneur with aim of powering up rural areas

- Started the company in 2011 with experience of handled more than 3500 solar projects
- Consultant and advisor to Variou Government organisations and Policy Making panels
- Visiting faculty in Universities Like Anna University , SASTRA , SRM etc.
- Industrial advisory member in Saveetha University
- Renewable Energy Consultant and advisor Kingdom of Bahrain

Message From Mr.A.Vijayabalan

“ I have great pleasure in penning this message, as we will be finally able to cater the community of Kerala effectively through our association with Amazing Hi Tech Solutions Pvt Ltd, I am highly confident that we will be able to provide world class quality, assurance and service in the solutions provided to our clients.”

ROOF TOP ON GRID SOLAR SOLUTIONS

ROOFTOP ON GRID SOLAR SOLUTIONS

Rooftop Solar Photovoltaics a suitable strategy for distributed generation of electricity while ensuring sustainability. Sun is the ultimate source of energy. Rooftop solar power plants harvest this inexhaustible energy by deploying solar modules on the rooftop. When the photons energy from sunlight hits the rooftop solar panel, the solar panel converts the photons to electrons of direct current (DC) electricity. Rooftop solar panels also come with Grid tied inverters that convert direct current electricity into alternating current (AC). This AC energy is used in the consumer end for captive usage and if any excess energy generated can be exported to the grid by the agreement with utility called as Solar Net meter.

ADVANTAGE

- Reduce electricity bills up to 80 to 90 percent
- Can Sell the excess energy to the electricity board and enjoy the income.
- Avails Benefits On Income tax
- Avail easy EMI facility
- Less Investment and Payback within 3- 4 years
- Very less maintenance

ROOF TOP OFFGRID SOLUTION

ROOF TOP OFFGRID SOLUTION

Transun Provides rooftop off grid Solar solutions to customers with Frequent Power Shortages. This system ensures Uninterrupted power supply to customer 24/7. We design roof top offgrid solar power solutions based on customer energy demand. These systems will help customers to meet their energy demands even at extreme natural calamity situations like cyclones and floods. Our carefully designed MPPT solar inverter along with Solar battery harvest more solar energy than any other system. Our offgrid system comes with option of connecting the Grid Power whenever required.

SOLAR UTILITY POWER PLANTS OR SOLAR FARMS

Solar Utility Power plants or solar Farms are large scale solar installations where photovoltaic modules are used to harvest the sun's power. They operate as power plants, just like a natural gas power plant or other sources of energy generation that have generated electricity. solar farm is as a photovoltaic power station, typically large decentralized solar array supplying electricity to the power grid. The majority of these massive arrays are owned by utilities and private developers are assets developed to supply power to utility. These farms can be a good investment option for Investors who are looking for returns within five years with income tax benefits.

SOLAR PUMPS

Solar water pumps are often used in remote areas where the cost of running traditional AC-powered water pumping is cost-prohibitive, or you just want to provide water to an off-grid home. Solar water pumping systems are also used to pump water for livestock and crop irrigation in remote locations. Our solar pump drives with inbuilt MPPT delivers maximum power from the sun to both submersible and surface water pumps. Transun solar power pumps support various applications including field irrigation or supplying potable water for your communities, while drawing water from underground multiple water sources as per requirement.

SOLAR TREE

A solar tree is an energy generator with a visual appearance similar to a tree, with the solar panels serving as its leaves. The solar tree has several advantages as it offers more than just energy output from its panels. Like

- Applications of solar tree
- Solar Trees as EV Charging station
- Solar trees for Garden Lighting
- Solar Trees for irrigation Pumps

BUILDING INTEGRATED PHOTOVOLTAICS

The concept of Building integrated photovoltaics (BIPV) refers to the integration of Solar technology to the architectural appearance of the building. These system adds the aesthetic value of the building apart from generating the energy needed for the building. BIPV is extremely versatile: it can be applied to curved surfaces; they can be custom-made; they can be different colours or transparent so that they can be integrated into windows; and BIPV can even be made from flexible material.

WIND SOLAR HYBRID POWER PLANTS

The wind-solar hybrid power system which harvest the solar and wind energy with the wind turbines Installed on the telecom towers or freestanding and photovoltaic system harvest power from sun.

- This system can altogether could assure uninterrupted power supply
- The wind solar hybrid system can be made as On grid as well as off grid.
- The intermittent nature of solar and wind power can be effectively mitigated. Energy storage on-site (batteries) ensures that power is available when the sun isn't shining or the wind isn't blowing.
- Expert system design and dimensioning with consideration of the local sunlight and/or wind patterns maximizes energy capture through a broad range of common conditions

The rooftop as well as Ground Mounted wind solar hybrid solution can be Provided

CLIENTS OF TRANSUN ENERGY SYSTEMS

About TRANSUN

TRANSUN Energy Systems is a solar Engineering, Procurement and Construction Company with Strong Experience in Installation of Rooftop and Utility scale Solar Power projects since 2011. The Company Mainly Focusses in Commercial, Industrial, Institutional and Residential Customer and has completed more than 3500 Rooftop and Utility Solar Power Plants in India with capacity of 150 MW Power and so on.

TRANSUN makes its Technological Capabilities available to Customers from Resource Assessment, Processing, Engineering, Design, Construction, Operation and Maintenance. TRANSUN has developed Key Relationship with Manufacturers, Suppliers along the Solar value chain to deliver EPC Solution for Rooftop and Ground Mounted Solar Parks. **Do Innovation, Quick Implementation, Customization based on need and scope for continuous Improvement in Project process gave Notable Position in the Industry. Having Efficient team with deep neck Experience in Developing and Maintaining Solar Power Plants with Best in class technology, TRANSUN position itself as end to end Solution Provider**
